Attn: R. H. Birk

TRANSMITTAL OF OPERABLE UNIT NO. 13 REVISED WORK PLAN - MBA-023-93

Enclosed are the revised Chapters 3, 5, 6, 7 and the Table of Contents for the Final Phase I RCRA Facilities Investigation/Remedial Investigation (RFI/RI) Work Plan for Operable Unit No. 13 (OU 13). Also included is a response to comment document which explains how the comments on the October 9, 1992 Final Phase I RFI/RI Work Plan for OU 13 were handled. These work plan revisions and response to comments are due to the Colorado Department of Health (CDH) and the Environmental Protection Agency (EPA) on March 10, 1993.

The major changes to this Work Plan included complete revision of the Benchmark Tables in Section 3, and revision of the Data Quality Objectives (Section 5), and the Field Sampling and Analysis Plan (Section 6).

This letter also serves as transmittal of a new revision of the HPGe SOP which was hand delivered March 8, 1993 in order to meet a deadline set by CDH as a condition for approval of this revised Work Plan. That SOP will be supplemented by a Compendium of In-Situ Radiological Characterization Methods and Analysis. We have committed to preparing a draft of this document for submittal to the regulatory agencies on or before April 2, 1993.

If you have any questions regarding the changes that were made, please contact M. F. McHugh of Remediation Project Management at 966-8624.

M. B. Arndt Director
